Linking to Library Article Databases

Link to database articles in web sites, documents, Canvas, or emails.

**EBSCOhost Databases**
- In EBSCOHost, the URL to send to other users is called a “permalink”
- Access the link from the individual record page by clicking permalink in the “tools” box located on the right side of the article record.
- Copy and paste the link that appears towards the top of the page.

**JSTOR**
- In JSTOR, linking is done with “stable URLs” that are located at the top of the article record. The stable URL is a direct link to the article.
- To link to the article off campus, insert the following prefix before the URL:
  http://ezproxy.prin.edu:2048/login?url=

**LexisNexis Academic**
- LexisNexis provides a “permalink” directly to articles. It is located on the top right above the article.
- To link to the article off campus, insert the following prefix before the URL:
  http://ezproxy.prin.edu:2048/login?url=

**Gale Virtual Reference Library**
- Gale Virtual Reference Library provides a “bookmark” to directly link to articles.
- Click on the “bookmark” icon in the upper right corner above the article.
- Copy and paste the link that appears in the pop-up window.

Updated 08/14/2017
Click the “abstract/details” tab at the top of the screen.

At the bottom of the screen, copy and paste the document URL to link back to the specific article.
